# 1.5 AMP NEGATIVE ADJUSTABLE VOLTAGE REGULATOR APPROVED TO DESC DRAWING 7703406

Three Terminal, Precision Adjustable Negative Voltage Regulator In Hermetic Style Packages (LM137A)

# **FEATURES**

- · Similar To Industry Standard LM137A
- Approved To DESC Standardized Military Drawing Number 7703406
- · Built In Thermal Overload Protection
- · Short Circuit Current Limiting
- Available In Six Package Styles
- Maximum Output Voltage Tolerance Is Guaranteed to ± 1%

# DESCRIPTION

These three terminal negative regulators are supplied in hermetically sealed packages. All protective features are designed into the circuit, including thermal shutdown, current-limiting, and safe-area control. With heat sinking, these devices can deliver up to 1.5 amps of output current. The LCC-20 device is limited to .5 amps. The unit also features output voltages that can be fixed from -1.2 volts to -37 volts using external resistors.

# ABSOLUTE MAXIMUM RATINGS T<sub>c</sub> @ 25°C

| Power Dissipation                                     |                    |
|---|--------------------|
| Case 2  |                    |
| Case-All Others                                       | 20 W               |
| Input - Output Voltage Differential                   | 40 V               |
| Operating Junction Temperature Range                  |                    |
| Storage Temperature Range                             | 65°C to + 150°C    |
| Lead Temperature (Soldering 10 seconds)               | 300°C              |
| Thermal Resistance, Junction to Case:                 |                    |
| Case 2, LCC-20  | 17°C/W             |
| Case U & M, TO-257 (Isol) and SMD-3                   | 4.2°C/W            |
| Case T&N, TO-257 (Non-Isol) and SMD-1                 | 3.5°C/W            |
| Case Y, TO-3  | 3.0°C/W            |
| Maximum Output Current:                               |                    |
| Case 2  |                    |
| Case-All Others                                       | 1.5A               |
| Recommended Operating Conditions:                     |                    |
| Output Voltage Range                                  | 1.2 to -37 VDC     |
| Ambient Operating Temperature Range (T <sub>A</sub> ) | 55°C to + 125°C    |
| Input Voltage Range                                   | 4.25 to -41.25 VDC |
|   |                    |

#### Notes:

- 1. Load and Line Regulation are specified at a constant junction temperature. Pulse testing with low duty cycle is used. Changes in output voltage due to heating effects must be taken into account separately.
- 2. If not tested, shall be guaranteed to the specified limits.
- 3. The denotes the specifications which apply over the full operating temperature range.

#### Notes:

- 1. Load and Line Regulation are specified at a constant junction temperature. Pulse testing with low duty cycle is used. Changes in output voltage due to heating effects must be taken into account separately.
- 2. If not tested, shall be guaranteed to the specified limits.
- 3. The denotes the specifications which apply over the full operating temperature range.

# TYPICAL APPLICATION

- $^*$   $\,$   $C_{in}$  is required if regulator is located more than 4 inches from power supply filter. A 1  $\mu F$  solid tantalum or 10  $\mu F$  aluminum electrolytic is recommended.
- $^{**}$  C  $_{o}$  is necessary for stability. A 1  $\mu F$  solid tantalum or 10  $\mu F$  aluminum electrolytic is recommended.

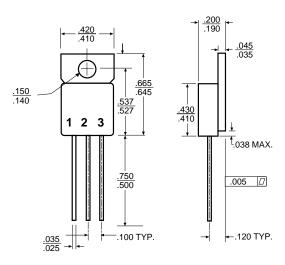

$$V_{out} = -1.25 \text{ V } (1 + \frac{R_2}{R_1})$$
